4D Training

4 Cyber scenarios you should use to test and demonstrate the coverage under your customers' cyber insurance policies

Programme content

As recent policy disputes have demonstrated, it is vital that insurers, brokers and customers all share the same understanding of what losses will be covered under their insurance policy.

As a relatively new policy, cyber insurance is often misunderstood and there are often significant differences in the coverage offered by insurers.

In this workshop we use common cyber claim scenarios then test them against policy coverage to demonstrate both the benefits of cyber coverage and the differences between policy wordings so we can all provide better and clearer advice to our customers.

Programme details

Date: Choice of dates available in 2021
Duration: 90 minutes
Time: TBC (GMT)
Fee: £50 +VAT per person
Online platform: Sessions will be hosted via Zoom, joining details will be sent 24 hours prior to the event.
