Drones Insurance Introduction

Who would benefit?

With businesses continually looking for innovative ways to deliver their products and services, use of drones or small unmanned aircraft systems is rapidly increasing across the commercial, public and private sectors. This course explores the topic of drones and the insurance covers available to protect against property damage and bodily injury resulting from use.

Objective

At the end of the course delegates will be able to:

- Outline what is meant by a drone/unmanned aerial vehicle
- Describe the main risks involved from use of drones
- Explain the regulatory issues of the use of drone/UAVs
- Explain the types of specialist insurance available

Content

- Overview of drones insurance, including its market history and regulation
- Drone elements and commercial uses
- Accidents and incidents, including danger to aircraft and other issues
- VSOL and BLOS
- Anti-terrorism
- Insurance classes and covers available, including:
 - Commercial hull and liability
 - Aviation products liability
 - Other covers
- Underwriting considerations
- Market challenges

Duration

One day
